

WHEN DISASTER STRIKES, TIME IS OF THE ESSENCE. MEASURE YOUR RESPONSE TIME IN MINUTES AND HOURS, NOT DAYS AND WEEKS.

Provide immediate protection to the victims of disaster with Dynamic Air Shelters. Set up simple shelters or fully operational medical facilities quickly to protect people from extreme weather, biological or chemical threats, and other life-threatening elements.

FAIL SAFE / SAFE FAIL

Dynamic Air Shelters stand up to the elements and continue to operate in environments where other temporary shelters may fail or collapse.

FIRE RESISTANT
to international standards

Withstands winds up to
**CATEGORY-3
HURRICANE SPEEDS**

Endure temperatures from
-60°F TO 158°F
(-50°C to 70°C)

Outstanding Interior
**TEMPERATURE
CONTROL**

Manages
**EXCESSIVE
SNOW LOADS**

FAST AND EFFICIENT

Time is precious in an emergency situation. Our shelters can be set up efficiently – some in less than 90 seconds. They can come fully equipped with flooring, electrical, HVAC, and air filtration, to enable emergency medical facilities to become operational quickly. Designed with durability in mind, our shelters are highly portable – some can even be dropped into remote locations via helicopter, so no locations are unreachable.

SAFE AND COMFORTABLE

Our shelters are designed to keep people safe. While the exterior is designed to withstand the world's harshest environments, the interior is outfitted with shatterproof lights that are hung without rigid components. The shelter itself is designed to move at very low velocity in the rare event of a structural failure, turning an otherwise dangerous situation into one with a very low probability of injury.

The inside of the shelter is a temperature-controlled environment, so while the shelter itself can withstand extremes of temperature, inside the structure maintains a comfortable working environment.

PROVEN AND TRUSTED

Dynamic Air Shelters have been deployed by a number of first response organizations to assist in dangerous environments. Our shelters have been key components of first response efforts in the Philippines, Haiti, Bangladesh, Guatemala, and Pakistan. Wherever first response teams are deployed to help people in need, Dynamic Air Shelters are there.

DESIGNED FOR YOU

Your priorities are our priorities

Rent for short-term use

14 standard sizes available

Easy, turnkey installation, set up by a small team – no cranes or lifting equipment

Can include flooring, furniture, electrical, lighting, HVAC, insulation and air filtration

Consult us for fully customized sizes and configurations
